DETAILED ACTION

- This action is responsive to the following communication: an Amendment filed on 8/19/05.
- Claims 9-14 & 24-37 are pending; claims 1-8 & 21-23 have been withdrawn; claims 15-20 have been canceled; claims 24-37 are newly added.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-14, 31-37 are drawn to a cable having a printer controller, classified in class 385, subclass 1.15.
- II. Claims 24-29 are drawn to a method for replacing defected cable with new compatible cable for a printing system, classified in class 439, subclass 1.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has other utilities such as connecting two host devices, and wherein invention II has other utilities such as replacing defected cable for different devices such as host pc, scanner, and etc. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, each Group requiring a separate field of search, and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
